

BRAND IDENTITY

EV CHARGING TERMINOLOGY

Under development: which terms serve our purpose, how to explain, evolving according to market developments

Charging speeds:

- I level 1: slow charging – typically a home charging solution
- I level 2: fast charging – most commonly offered on-street and in parking facilities
- I level 3: rapid charging – most commonly offered as motorway charging and in some PFs. For example at Q-Park Centrum in the Hague, click [here](#) to read the showcase.
