BCE

Before (the) Common Era

Branding (origin)

The practice of branding is thought to have begun with the ancient Egyptians, who were known to have engaged in livestock branding as early as 2,700 BCE. Branding was used to differentiate one person's cattle from another's by means of a distinctive symbol burned into the animal's skin with a hot branding iron.

Branding (today)

In the modern era, the concept of branding has expanded to include the marketing and communication methods that help to distinguish a company or products from competitors, aiming to create a lasting impression in the minds of customers. The key components that form a brand's toolbox include a brand's identity, brand communication (such as by logos and trademarks), brand awareness, brand loyalty, and various branding (brand management) strategies.[6] Many companies believe that there is often little to differentiate between several types of products in the 21st century, and therefore branding is one of a few remaining forms of product differentiation

CCPD

Corporate Car Park Design

CGS

Customer Guidance System: the signage used in parking facilities, mostly red and green.

CMYK

The CMYK colour model is a subtractive colour model, based on the CMY colour model. It is used in colour printing, and is also used to describe the printing process itself. CMYK refers to the four ink plates used in some colour printing: cyan, magenta, yellow, and key (black). (Source: Wikipedia)

ESPA

European Standard Parking Award

EU English

EU English is used to refer to a particular variety of the English language involving both EU terminology and a number of other EU-specific lexical, grammatical and discourse features. Since the EU is involved in all walks of social, political and cultural life, EU English features characteristics of political, legal, business, and even academic discourse, thus mirroring the different functions and multiple activities of the European Union as a cultural, political and historical reality.

RGB

The RGB colour model is an additive colour model in which red, green, and blue light are added together in various ways to reproduce a broad array of colours. The name of the model comes from the initials of the three additive primary colours, red, green, and blue.
