HOUSE STYLE MANUAL

Real Estate **house style** finds expression in our parking facilities by application of house style characteristics, and especially the design of these characteristics.

Design as important contribution to house style characteristics

- | Colour concept
- | Parking layout & routing
- | Transparency
- | Lighting concept

House style characteristics

- | Entry car park
- | Parking equipment
- | Internal signage
- | Pedestrian signage
- | Typical house style elements

Colour concept

Our colour concept is characterised by the application of a limited amount of neutral colours.

- | Floors (floor coating and lineation on concrete, asphalt or brick pavement) : white, grey or anthracite.
- | Floor coating, in house style colours, contributes strongly to the house style characteristics, but the application is not a condition: it strongly depends on the underground and the need to protect the construction.
- | Columns / walls / ceilings : white, grey or natural concrete.

The use of these calm colours contrasts well with the parking equipment, internal signage and striking house style elements and finally contributes to a better orientation.
